re: R & D Biog

Dear Barbara:

Attached is my critical critique as you requested.

Style-wise it needs a great deal of work as well.

And someone is needed who can verify the data in the Dn/Scn section. This is beyond my capacity.

If someone is going to re-write it, I will make my files available, even to a professional outside writer, but I haven't got the time nor the skill to do it myself.

ML
